

Dear Authors, all papers below will be peer-reviewed in the editorial system of individual journals. **You should submit your paper directly to the submission systems of the journals. Please do not send any paper to the conference system. In some of the journals, you may select “EWRES 2013” phrase as special issue item in place of regular issue. If this phrase does not exist in the submission systems, directly select “regular issue”. It means that later the journal will clarify the special issue if it does not exist. It is the matter of publication house. Do not forget to change the content at least 40%. Since the papers published in the EWRES 2013 Proceedings, it is obligatory to do it. You can enrich the content for this purpose. You may also change the title. As a footnote please write to the first page of your paper “The short form of this study was published in II. European Workshop on Renewable Energy Systems (EWRES 2013)”**

**That is very important to eliminate the duplication of your paper.**
