

IMPORTANT!

PLEASE READ CAREFULLY

SPECIAL ISSUE INFORMATION FOR AUTHORS

All papers should be improved on following points:

1. The papers submitted to the journals **MUST NOT** include **conference logo or title**. Please read the author guidelines of **relevant journal**.
2. All terminology, sentences and figures should be in English. No other language is accepted.
3. The extended papers should be submitted to the journals till **15th October 2020**, if no other dates are not specified below. No extension to this date is available.
4. All papers will be peer-reviewed in the journals.
5. At least **1 and a half** page introduction section is required for all papers. Otherwise, it will be directly rejected by the journal editors.
6. An archival part which defines the methodology and technique should be addressed and extended.
7. All paper sections should be extended.
8. The authors' first names and family names, address, and an e-mail of corresponding author should be clearly defined. **Do not make abbreviations in author names.**
9. **The papers should be sent to the determined journals by writing them in journal format. Do not send the conference-templated paper to the journal. That may cause rejection.**
10. The reciprocal reference is very important. At least 1 published references per journal from the ECRES Special Issue journals should be added to the References section of your paper. For instance your paper is submitted to Technology and Economics of Smart Grids and Sustainable Energy, one should put references from the journals other than this journal (i.e. J. Energy Systems, Journal of Materials, Energy Sources, Journal of Polytechnics). Links of journals can be obtained by clicking on journal logos in conference website for this purpose. If the journal scope above is irrelevant, please do not try to find references from the journal. That is important to rise up the ranks of our journals.
11. Each paper should have minimal 20 references and maximal 40 references.
12. **Internet addresses cannot be assigned as references.**
13. The references from conferences cannot exceed 4 in the references section.
14. References from SCI, E-SCI and SCOPUS and EBSCO indexed journals are acknowledged.
15. The paper titles should be shortened as much as possible. **Do not use abbreviations in the titles.**
16. **Nomenclature is needed for the papers which have too much abbreviations and scientific variables.**
17. **The French, Arabic and all other languages from equations and figures should be translated to English.**
18. **At least 40% new content should be added to the journal version of your paper.**
19. The maximal page limit depends on the journal policy.
20. All figures should be drawn clearly with large resolution. Journals may reject for low-quality figures.
21. **Before the submission, please note that for ENERGIES, JOM and TECHNOLOGY AND ECONOMICS OF SMART GRIDS AND SUSTAINABLE ENERGY journals, you must select the Special Issue title from journal submission page. That is important, otherwise your paper is listed to regular issue and can get out of scope rejection.** Please consult to ekurt52tr@yahoo.com if you face with any SI title problem for those 2 journals.
22. **After the peer-review process, if your paper is rejected from the journals, you can always submit your paper to J. Energy Systems, which is the official journal of ECRES.**
23. Before the submission of your paper, please check the iThenticate similarity test. If the overall similarity exceeds the limit 20% similarity, the paper would be directly rejected by the journals' editors and no other chance will be given to the author(s) to re-submit it. That is a critical point.
24. The single paper similarity must not exceed the limit 5%. Otherwise, the paper will be directly rejected by the journal editor and no other chance will be given to the author(s) to re-submit it.
25. We are not responsible to check the papers via iThenticate. Each author must do it, individually.
26. The papers of **International Journal of Renewable Energy Development** will only be directly send to ekurt52tr@yahoo.com by writing "IJRED-SI" to their e-mail subject. Please also write 2 possible international reviewers to your e-mail while sending it.
27. In the submission procedure, if you have any problem, please do not hesitate to write an e-mail to ekurt52tr@yahoo.com .
