Title: Special Session on ENERGY EDUCATION

Special Session Submission Code: Special Session B

Prof. Dr. Mehmet Tekerek
(Kahramanmaraş Sütçüimam University), Turkey,
tekerek@ksu.edu.tr

Assoc. Prof. Dr. Ümran Betül Cebesoy
(Uşak University), Turkey,
cbsybt@gmail.com

Due to the increasing importance of producing and consuming energy more sustainably, Energy Education has evolved into a thriving research area. The purpose of the Energy Education Session is to engage energy educators in all sectors, including K-12, higher education and public education in sharing best practices and developing partnerships, in order to expand the impact and effectiveness of energy education.

The Session will cover what we teach in energy education, how we teach it, how we can collaborate to teach it better, and how we can overcome critical challenges. We hope that the presentations in this special session will provide a future vision for energy education.

Energy Education has been and continues to be a rapidly changing field. Education programs need to be adapted to changes in energy technologies, consumption patterns and sustainable development.

With this session, we would like to portray the key components of Energy Education. Topics will include (but will not be limited to):

- Sustainability in Education
- Renewable Energy Sources
- Teaching Renewable Energy in K-12 & Higher Education
- Awareness and Knowledge Towards Energy Use
- Future Energy Sources
- Pre-Service and In-Service Teacher Training for Energy Education
- Lifelong Learning for Energy Awareness
- Sustainable Development Perspective
- Affordable and Clean Energy

Paper Submission: <https://www.ecres.net/submission.html>

Note: While submitting your paper to the submission panel, please select the track under the name "Special Session B". That is very important.
